

AUSTRALIA'S FIRST CHOC-MACADAMIA SPREAD, MACABELLA, HAS JUST MADE OUR SHELVES A WHOLE LOT SWEETER

You've probably eaten a chocolate spread before, and you most likely enjoyed it, but the Mac Farms team at the Buderim Ginger Group has just launched a product set to revolutionise the taste of choc-condiments, *Macabella*.

The first of its kind in Australia, Macabella is a macadamia nut infused chocolate spread made with only the highest quality ingredients. The creamy Belgian recipe delivers a luxurious cocoa blend that, when paired with the crunch of the finest roasted macadamias, creates a premium taste affair.

Not only does the quality and flavour supersede other spreads available on the market, but the inclusion of macadamias makes Macabella an indulgence you will feel good about.

Macadamias are a nutrition powerhouse and contain many nutrients including heart-friendly monounsaturated fatty acids.

Offering much more than just a simple breakfast spread, the range of ways you can enjoy this taste sensation are endless. Whether it's spread generously on croissants or crepes, drizzled over fruit, or as an ingredient in your favourite dessert, the versatility of Macabella means you can treat yourself to this delicate and delicious offering no matter the occasion.

With all key ingredients sustainably sourced and guaranteed to be of the highest of quality, Macabella promises a premium spread, at an affordable price. RRP \$5.29.

Macabella is now available from Woolworth's and Coles stores nationally.
